Votes

City	Color	Votes
Anchorage	Blue	10,000
Anchorage	Yellow	15,000
Brooklyn	Red	100,000
Brooklyn	Blue	250,000
Detroit	Red	160,000
Selma	Yellow	15,000
Selma	Violet	5,000

WEB PAGE

- Create a web page in PHP that uses the two MySQL tables above "Colors" and "Votes".
- The left column should be populated from reading all the entries in the Colors table.
- The colors should be links, so that when you click on it, an Ajax call populates the Votes (obtained from MySQL) in the right column next to the color.
- When Clicking on "Total", use JavaScript only (no server involvement) to add up and present the totals shown.
- Write something that you would feel comfortable shipping & maintaining.

Colors

Click on the Color Name to see how many votes for that color.
When you do click on Total, the sum of above numbers will show

Color	Votes
Red	
Orange	
Yellow	
Green	
Blue	
Indigo	
TOTAL
